

IPAD 2 DESKTOP STAND WITH SECURITY CABLE (8WARE)

**Protect your iPad from scratches,
bumps and thieves with the security case and lock**

The case is made from a rigid, hard plastic for protection of an iPad and features cut outs which allow you to fully use an iPad without having to remove it from the case. The case also features a built in stand which allows you to view your iPad in either vertical or horizontal rotations depending on your needs.

Built in security slot to attach a security cable with lock

The iPad security case comes with a built in security slot so you can attach a Security cable lock to keep your iPad safe and secure whilst you're not using it.

Comes complete with a strong steel cable

The case comes with a strong steel cable that will discourage any thief. Weighing less than one 1KG, the cable is extremely sleek and its lock-head has the smallest diameter of any computer lock. This makes the iPad Lock flexible and light, not to mention stylish, so you can easily pack it in your bag and take it with you wherever you go.
